

ENVIRONMENTAL POLICY

Industrias Alegre is a company dedicated to the transformation of thermoplastics and the manufacture of injected and assembled parts for the automotive industry and other industrial sectors, including the segment corresponding to R&D&i. The products we produce are subject to extremely high demands from our clients, technological requirements, deadlines and pricing, as well as direct competition from other companies.

The Industrias Alegre, S.A. Management establishes so in its Environmental Policy and acquires the compromise of publishing, implementing and keeping it up to date:

- Commitment to fulfil all the legislation, applicable normative and all those requirements related to the environment that the company subscribes.
- Commitment to inform properly our suppliers, clients, subcontractors and partners about environmental activities of the company, to develop a transparent environmental management.
- Commitment to develop our activities and services guaranteeing an appropriate environmental management, along the life cycle of the product applying the principles of prevention and minimization of all the environmental aspects with special relevance to waste, energy and resources consumption, protecting the health and the nature of the environment.
- Commitment to the continuous improvement of our services, activities and products in the scope of its relation to the environment. To attain so, targets and goals will be established systematically and revised in the future, according to this environmental policy.

The fulfilment of these principles is guaranteed through to the Environmental Management System and its continuous update, additionally to the collaboration, training and awareness of all those who belong to Industrias Alegre, S.A.
